

Exchange Synchronizer

The ultimate bridge between SuperOffice and Microsoft Exchange.

Synchronize SuperOffice CRM with Exchange

What is it?

In today's mobile world staying in sync with the rest of your organization is crucial. The ability to plan and react on the spot has never been more important. With the Exchange Synchronizer you are able to synchronize your SuperOffice diary and SuperOffice contacts with Microsoft Outlook and share appointments with other employees in your organization not using SuperOffice CRM.

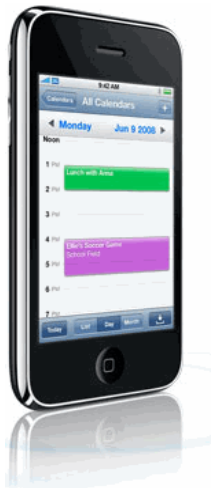

With no user interaction at all the Exchange Synchronizer software will ensure that your SuperOffice CRM and Outlook are always in sync.

Truly Mobile

Suppose you are traveling and just not in touch with your PC and you need to access customer contact information or appointments in your diary? With a PDA (ActiveSync), a SmartPhone or regular mobile phone (has to be able to sync with Microsoft Outlook) you can take your appointment and contacts in Outlook (synchronized with SuperOffice CRM) with you on your small footprint device - look up information, add information or change existing information - everything will be synchronized when your PDA or SmartPhone connects to your PC or you could synchronize the information instantly through a wireless connection (WLAN, GPRS etc.) with the company's Exchange server (MS Mobile Services/ActiveSync needed) and at the same time get updated information in return.

The Facts

- Two way synchronization of your SuperOffice diary and tasks with Outlook. Ideal for companies that use Outlook as corporate calendar system.
- Synchronizes your SuperOffice contacts (related to appointments or tasks) and your personal SuperOffice Selection with Outlook contacts.
- All features from Outlook calendar are supported, like all-day events and recurring appointments.
- Keeps every PDA or (Smart)phone that supports Outlook sync capabilities up to date.

Calendar, contacts and to-do's are always up to date when you are on the road.

- Outlook calendar, tasks and contact folder on the Exchange server are always up to date for quick synchronization.
- Wireless update of your PDA or (Smart)Phone (ActiveSync services of Microsoft Exchange required)
